NICOLE ANNE PONCE

CYBERSECURITY CONSULTANT

SUMMARY

Recent Ngee Ann Polytechnic graduate with a background in Cyber Security and Digital Forensics. As a meticulous individual with excellent communication, I hope to work in a team of like-minded people. I have a deep passion for network security and my career goal is to be a security architect in the future.

WORK EXPERIENCE

Cyber Security Consultant at Attila Cybertech Pte. Ltd
September 2020 - February 2021

• In charge of VAPT project on OT and IT systems and shadowed for Vulnerability Assessment projects for clients such as LTA Singapore.
• Developed possible and tested Attack Scenarios on SCADA System
• Worked with multiple OT specific IDS such as Silent Defense, Guardian and Indegy.
• Attended workshops and company meetings with companies such as Forescout, Nozomi and Tenable
• Developed a proof of concept and assisted to demonstrate functionality to clients.
• Assisted in solution evaluation for clients such as Cyber Security Agency of Singapore.
• Throughout my internship I have been working with OS such as CentOS and RHEL 8.

Hospitality Server at SATS Delaware North
September 2019 - May 2020

• In charge of food stocks and inventory.
• Networked with many professionals in various firms and organizations. E.g. Singtel and Starhub
• I served as a friendly, hardworking, and punctual employee. I learned effective verbal communication, customer service and professionalism.

LEADERSHIP EXPERIENCE

iDA, Youth Infocomm Ambassador
2017 - 2018

Appointed as a Youth Infocomm Ambassador in 2017 by the Infocomm Development Authority of Singapore.
• Attended workshops to better understand latest technologies and programming languages.
• Managed events for secondary schools to get familiar with infocomm and technologies.
• Managed logistics and proposed creative ideas for the event.

EDUCATION

Diploma in Cyber Security & Digital Forensics
April 2018 - May 2021

I built a solid foundation in Cyber Security. The modules I enjoyed the most was Cryptography, IT Governance, and the Networking modules. I also received a Module Distinction in Networking Infrastructure and has done very well in Network Security. At school I learnt how to configure routers; theory on structured cabling, VLANs, Firewalls and Active Directory. Throughout the course, I have been working with Windows and Linux Operating Systems.

Participated in:
DSTA CDDC CTF Competition 2020
GovTech CTF Stack The Flag 2020

LICENSES & CERTIFICATIONS

Automation with Python Programming
Udemy | Issued May 2020
